Aurora™ Keyboard Tray

The Aurora keyboard tray is a revolutionary concept in keyboard stability. With strategically positioned channels cut into the back corners, the keyboard remains firmly situated on the tray without alternative non-slip methods such as adhesives. The channels effectively hold the feet of the keyboard in place for solid, secure placement.

Aurora's unique shape, phenolic material and channel design will enhance the form and function of any workspace. Available in two keyboard tray / mouse tray combinations, the Aurora is an elegant and sensible addition to Sunway's family of products.

- Height Adjustment
- Tilt Adjustment
- 360° Rotation
- A Comfortable, Hygienic Wrist Rest
- A Stylish and Durable 1/4" Thick Composite Phenolic Laminate Keyboard Tray
