## Cornermaker™ - CMA200

When it comes to workplace ergonomics, a challenging desk configuration doesn't have to challenge your comfort. The Cornermaker slides over most any 90° or small diagonal desk surface to create a corner workstation solution. After attaching the Cornermaker to the desk surface, the newly created diagonal corner is a practical computer workstation. Easily mount most any complete keyboard system directly to the Cornermaker and the underside of the desk. Cornermaker will accommodate all Sunway complete keyboard systems.

• Overall Dimensions: 19 3/8"w x 9 5/8"d x 1 7/8"h
• A Sturdy Aluminum Lip Hangs Down 1 3/4" from the Surface of the Cornermaker
• Surface Material is Constructed from 1/4" Thick Composite Phenolic Shaped as an Arc with a Radius that Measures 9 5/8"
• The Integration of These 2 Materials Produces a Lightweight Product with an Extremely Strong Structure.
• A Separate Aluminum Bracket is Secured to the Underside of the Cornermaker, as well as the Underside of the Desk, and Clamps the Cornermaker to the Desk Surface
• 2 Different Length Fastening Bolts are Included for Clamping Cornermaker to Different Thicknesses of Desk Tops
• Clamp Bracket is Adjustable for Desks from 7/8" to 1 1/2" Thick
• Clamp Bracket is Pre-Drilled with 2 Mounting Slots for Easy Attachment of Most any Track Based Keyboard System
• A Separate Bumper is Combined with Fastening Bolt which is Positioned at the Front of the Track and Acts as the Stop for the Keyboard Arm
• Black Phenolic Surface; Silver Aluminum Brackets
• Some Assembly Required; Mounting Hardware Included

*Keyboard systems sold separately.*
