

Rock 'n Stop™ Footrests

The ingenious Rock 'n Stop leg design provides front to back motion as well as the ability to stop in various positions along the way. This encourages movement while sitting stationary, promoting both circulation and muscle stimulation.

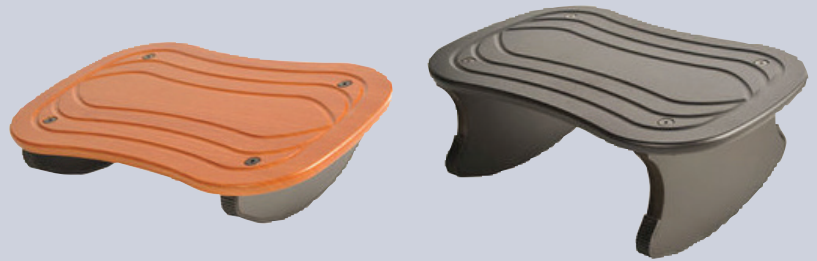

A stylishly designed, contoured shaped platform with smooth finished edges, complements any work environment.

The surface is grooved for both a non-skid application and a comfortable feel.

Promote your company with custom engraving. Platform surface may be custom engraved with company name.

FR6000 & FR8000

- Overall Outside Dimensions: 17 1/2" w x 11 1/2" d x 3 1/2" h or 6 1/2" h (measured from floor to top of platform)
- The leg design incorporates a 3/4" thick MDF for stability and rigidity
- A corrugated rubber strip is applied at the bottoms of the legs. This prevents slippage on most floor surfaces and provides longer life for the product.
- A sturdy and attractive vinyl is laminated to the footrest platform to guarantee years of support.

Double Wide Footrests

FR6000BDW & FR6000HDW

- Because not all bodies are created equal, our double wide footrest has 6" more foot space than our standard Rock 'n Stop
- Extra wide to conform to a more natural leg spread
- Overall outside dimensions: 23 1/2" w x 11 1/2" d x 3 1/2" h (measured from floor to top of platform)
- Available in 3" h version only
- A 3 legged design for extra stability
