Innovate your space

Innovative spaces require innovative products. Stratis Industries Centuria Collection is the highest in performance, flexibility, and cleanability, while also being functional.

Thermofused Laminate (TFL) materials are made using a resin-impregnated sheet of décor paper that is fused to an engineered composite substrate. PVC edge band is applied to finish the exposed edges. The result is a product with exceptional performance.

The Centuria Collection offers high end durability and feel at an affordable price. High quality materials and hardware are used in the construction. All products are meticulously assembled with our finest craftsmanship right here in the USA.

You no longer have to sacrifice quality for affordability to meet the rigid standards of the healthcare industry. The Centuria Collection offers a complete line of casegoods and accessories, constructed with a unique, 3-step process that makes it the cost effective choice for Residential Living Facilities. The Centuria Collection design style can be used in all types of industries, from office spaces, to the hospitality industry and everything in between.

SHELL/DOORS/

DRAWER FRONTS

- Thermofused Laminate (TFL)
- PVC edge band applied with PUR* adhesive

Centuria

COLLECTION

The Centuria Collection is named for the small town of Centuria, WI, where Stratis Industries is located. Just like a small town, this furniture line will give you a sense of community and the feeling that someone really cared when they designed this line. Custom sizes available. Contact your Sales Representative for more information.
